HUDSON FORGE BEDROOM SPECIFICATIONS:

BED SPECIFICATIONS:

- All steel construction sourced in North America
- Lead free paint system
- Headboards and Footboards are constructed with various dimensions and shapes of solid steel tubing. All components are welded, ground, and spot finished for a smooth surface.
- The completed components are cleaned and treated prior to painting to insure excellent adhesion of the painted finish.
- The bedding support system includes steel tubing "ribs" that span the width of the bed. The ribs are attached to steel angle side rails with plastic Z clips and 1 7/8" #10 screws.
- Full & Queen size beds have 2 center supports that attach to the ribs with 1 1/2" bolts and lock nuts. Each support system attaches to the bed ends with 8 appropriate length bolts (depending on thickness of tubing), washers and lock nuts. The bolts pass completely through the bed end tubing for durability and additional support.
- The support system has 3 options for bed height depending on user preference and the whether a box spring is being used.
- The headboards can also be combined with our standard metal bedframes for a simple bed with no footboard.
- The weight limit for beds ranges from 300 lbs to 600 lbs based on the size and style of the bed.
- All packaging is from recycled materials and the use of non-degradable packaging is kept to an absolute minimum.
